

Angelini Pharma, the leader in dialysis antisepsis and disinfection, introduces:

PERACIDIN® RO DISINFECTANT

Maximizing your water treatment system performance!

PERACIDIN® RO DISINFECTANT is a proprietary Peracetic Acid solution specifically intended for use in reverse osmosis (RO) membranes and their hemodialysis RO water distribution systems, with the following key properties:

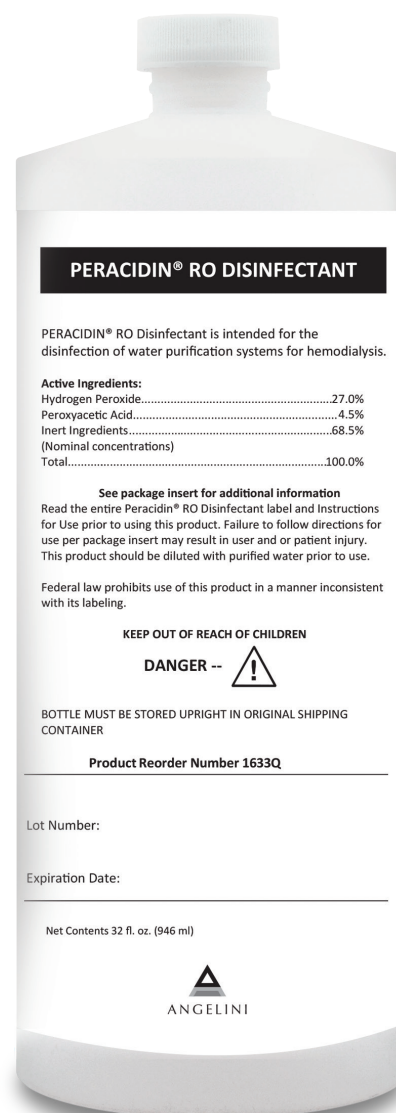

- Recommended for disinfection of hemodialysis RO systems at a 1% dilution
- A powerful oxidizer that inhibits microbial cell proteins and enzyme systems from growing
- Effective in removing biofilm
- Effectively reduces bacteria growth
- Environmentally safe with a long-lasting life span (1 year for undiluted product and 7 days when diluted)

PERACIDIN® RO DISINFECTANT offers a broad range of protection:

- Bactericidal
- Pseudomonacidal
- Sporicidal
- Virucidal
- Tuberculocidal
- Non-Tuberculous Mycobacteria

PERACIDIN® RO DISINFECTANT is the preferred choice for hemodialysis water purification systems.

Don't get caught off label!

PERACIDIN® RO DISINFECTANT

PERACIDIN® RO DISINFECTANT

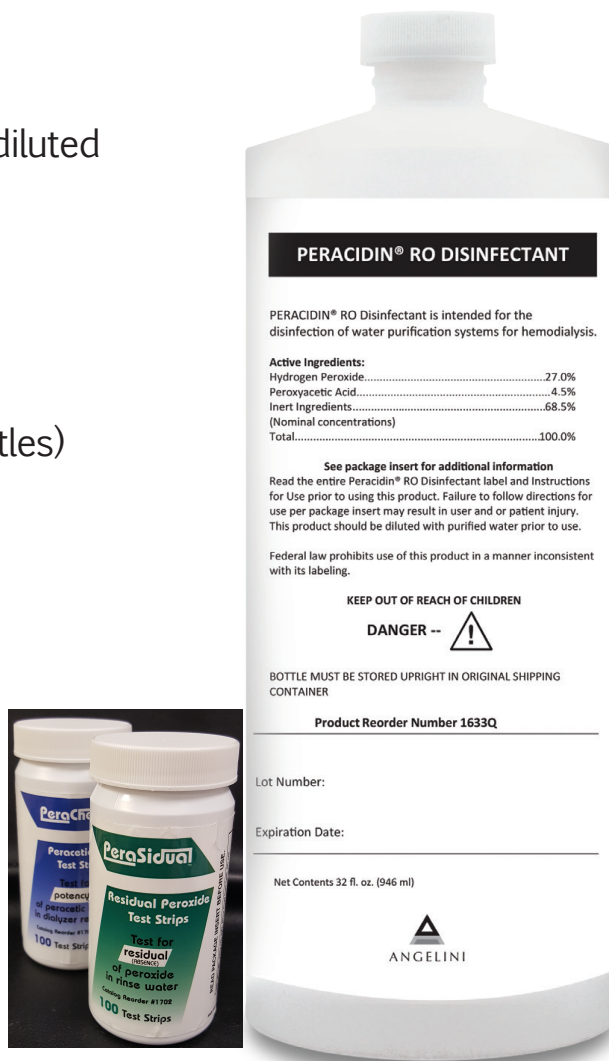

- Stable for 1 year when stored properly undiluted
- An effective cleaning agent
- Completely safe for the environment

PERACHEK® RO (Available in 100 strip bottles)

- Used to confirm concentration levels of PERACIDIN® RO DISINFECTANT in the RO water system
- Accurate and safe

PERASIDUAL (Available in 100 strip bottles)

- Used to detect the residual of PERACIDIN® RO DISINFECTANT in the RO water system
- Accurate and safe

Available in the following sizes:

			Product Code:
PERACIDIN® RO DISINFECTANT	Gallon	Case of 4 Bottles	1633G-04
	Quart	Case of 4 Bottles	1633Q-04
PERACHEK® RO (Positive Check Test Strips)		Bottle 100 strips	1801-01
PERASIDUAL (Residual Test Strips)		Bottle 100 strips	1702-01
